Denver, Colorado

### SUMMARY

Dedicated Java developer with over 5 years of experience in crafting cutting-edge software solutions. Adept at Spring Boot, clean code, and collaborative team success. Acknowledged for contributing significantly to project successes.

### EXPERIENCE

#### Senior Java Developer

##### Tech Innovate LLC

06/2018 - Present Denver, Colorado

- Led a team of 10 developers in creating a scalable financial application, reducing processing time by 20%
- Implemented a suite of robust tests for a new SaaS solution, improving system reliability by 15%
- Optimized existing codebase, resulting in a 10% increase in application performance for key clients
- Developed and maintained documentation for over 30 APIs, ensuring compliance with industry standards
- Achieved a record of zero down-time for consecutive 12 months across all managed projects
- Designed and deployed a new feature module that boosted customer engagement by 25%

#### Java Developer

##### Global Code Factory

02/2016 - 05/2018 Denver, Colorado

- Played a pivotal role in the integration of a microservices architecture, enhancing system modularity
- Collaborated with international teams to deliver a market-responsive supply chain management tool
- Streamlined database integration processes, shortening development cycles by 30%
- Authored technical documentation that improved cross-functional team understanding by 40%
- Mentored 3 junior developers, improving team productivity by 20%

#### Associate Java Developer

##### InnoSoft Dynamics

08/2013 - 01/2016 Denver, Colorado

- Contributed to the creation of an award-winning travel application used by 500k+ users
- Streamlined the CI/CD process, reducing build times by approximately 25%
- Participated in weekly Agile ceremonies to keep the project aligned with client needs
- Assisted in the migration of a legacy system to a modern Java environment

### EDUCATION

#### Master of Science in Computer Science

##### University of Colorado Boulder

01/2013 - 01/2015 Boulder, Colorado

#### Bachelor of Science in Software Engineering

##### Colorado State University

01/2009 - 01/2013 Fort Collins, Colorado

### PROJECTS

#### Open-source Java e-commerce framework

Contributed to a Java-based e-commerce solution, optimizing checkout flow and payment processing for small retailers. See more at [github.com/ellawhite/ecommerce-framework](https://github.com/ellawhite/ecommerce-framework)

#### Community-driven event coordination API

Created an API to simplify event planning for community organizations, with a 15% increase in user engagement year-on-year. Check the repository at [github.com/ellawhite/event-api](https://github.com/ellawhite/event-api)

### ACHIEVEMENTS

#### Implemented High-Performance Financial Application

Spearheaded the development of a high-performance financial application, leading to a 20% improvement in transaction processing speed.

#### Maintained 100% Uptime Record

Championed backend stability initiatives, maintaining a 100% uptime record for managed services over a 12-month period.

#### Supervised Successful Database Integration

Successfully supervised a critical database integration that shortened the development cycle for new software features by 30%.

#### Enhanced Product Features Led to Increase in Engagement

Developed key product features that resulted in a significant boost in customer engagement by 25%.

### SKILLS

Java Spring Boot Git

Software Development Lifecycle

Continuous Integration

Test-Driven Development
